

Finally, an affordable and easy way to share the whole Word of God!

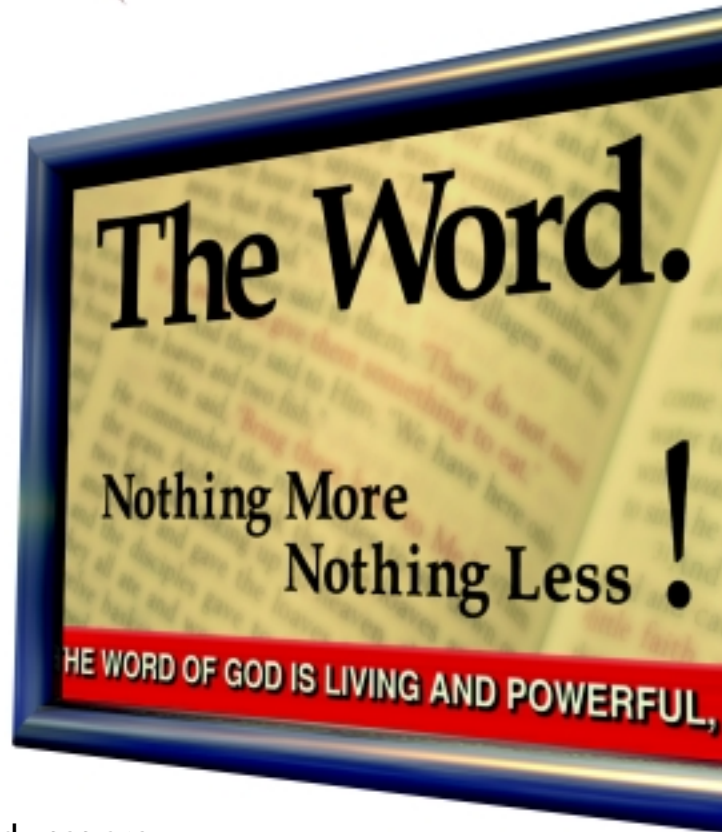

Good News Ticker is an easy to use software program that displays the entire Bible in a customizable “ticker” or “crawl” style format. Just as popular news and financial programs utilize tickers for a variety of different types of information, you can now do the same with the Word of God!

- Easy to install
- Fully Automatable
- Completely Customizable

Good News Ticker from Pixel Perfect Graphics, is based on the powerful CG Excelerator graphics engine so it's applications and uses are virtually limitless. In addition to displaying the Word of God, custom modules can be easily programmed for a variety of other important functions as well:

- Display real-time donor contributions during fundraisers & telethons
- Display scriptural references to support Bible teaching programs

“For the Word of God is living and powerful, and sharper than any two-edged sword...”

Hebrews 4:12 (NKJV)

Feed the Multitudes!

Send out the Word of God which will never return void!

“...So shall My word be, that goes forth from my mouth; It shall not return to Me void,
But it shall accomplish what I please, And it shall prosper in the thing for which I sent it.”

Isaiah 55:11 (NKJV)

*Maximize your bandwidth
with dual programming –
Your regular programming
on the top of screen – and
the Word of God on the
lower portion*

Good News Ticker works on popular broadcast graphics platforms such as the Chyron Infnit™ family and their Digital PC-Codi™. Its simple interface allows it to be fully customizable according to content. It's an ideal solution for scriptural references during teaching segments and perfect for 24/7 programs such as “The Worship Channel”. And because it works within existing broadcast technology standards, Good News Ticker requires little or no training and can be implemented literally immediately.

Technical requirements:

Windows 98/NT/2000/XP
Pentium II CPU, 300 Mhz
256MB RAM (512MB recommended)
50MB Hard Drive Space
CD-ROM Drive
10/100BaseT Network Interface
